Picking Up The Slack

Initiatives

Where the job of the city ends, ours begins! Waste management empties the can, but that isn't always enough. We step in and clean around the trash can. Additionally, we pick up the debris that is left when the business cans are emptied. We make sure that the public trash receptacles are clean, presentable, and ready for use. We take these extra steps and many more to fill in the gaps between what the city does and what the community needs.
